

UCLA-OLIVE VIEW INTERNAL MEDICINE RESIDENCY PROGRAM

GLOBAL HEALTH MEDICINE CURRICULUM

Prior to departing on your global health elective, the following online modules are recommended to better prepare you to be an effective medical provider abroad. Required modules are listed here and are to be completed during your elective. Please copy and paste the URL into your web browser to start.

These online lectures are intended to be used as an educational resource for physicians volunteering abroad during global health rotations. Numerous online courses have been developed for both faculty and students to provide global health training. The following curriculum is a compilation of selected modules from various sites.

Curriculum Outline

I. Introduction to Global Health

- Required module: What are Best Practices and “Gold Standard” Principles?
<http://www.uniteforsight.org/global-health-course/module1>
